#### REMARKS

Claims 1-29 were pending in the application. Previously, Claims 2-14 were amended, and Claims 1 and 15-28 were withdrawn. Currently, Claims 7 and 29 are amended to correct grammar and spelling.

The Examiner has required restriction to one of the following groups:

Group I: claims 22-25, drawn to nucleic acid based methods for determining a potential of a diabetic patient to benefit from antioxidant therapy for treatment of vascular complications;

Group II: claims 27-28, drawn to protein based methods for determining a potential of a diabetic patient to benefit from antioxidant therapy for treatment of vascular complications;

Group III: claims 8-11, drawn to a kit comprising reagents for determining haptoglobin phenotype using nucleic acids; and

Group IV: claims 13-14, drawn to a kit comprising reagents for determining haptoglobin phenotype using immunological reagents.

Applicants elect to pursue the claims of Group IV, claims 27-28, drawn to a kit comprising reagents for determining haptoglobin phenotype using immunological reagents, and linking claims 2-7, 12 and 29.

Applicants further request that upon the finding of allowability of the linking claims, the claims of Group III, claims 8-11, to a kit comprising reagents for determining haptoglobin phenotype using nucleic acids, be rejoined.
